

Final report PT-01: Td 2/2022

PT-01: Artificial digestion to detect *Trichinella* larvae in meat samples according to the Regulation EU 2020/1478 and Regulation EU 2015/1375, Annex III

Design

Purpose	Evaluation of laboratories in charge for official inspection to detect <i>Trichinella</i> spp. larvae in meat	
Scheme type	Single, simultaneous	
Participants	Public and private, national and international laboratories	
N. of participants	Depending on requests	
Method	Reg EU 2020/1478 and Reg EU 2015/1375 (Ann III)	
PT items	Matrix	Pork/horse meat
	Item	<i>Trichinella</i> live larvae
	N. of samples	
	Distribution	Immediate shipment after preparation
Subcontracted activities	NA	
Results evaluation	Qualitative, as stated in the ISO 18743:2015 cited in the Reg EU 2020/1478	

Implementation

N. of participants	32	PT items	Pork	96
Public laboratories	32		Horse meat	0
Private laboratories	0		PT panel composition	1 negative and 2 positive samples (3 and 5 larvae)
			Shipping	DHL
Shipping date	March 14, 2022			

PT Provider
 Unit of Foodborne and Neglected Parasitic Diseases
 Istituto Superiore di Sanità

viale Regina Elena, 299 – 00161 Rome, Italy

Person in charge of PT: Dr Gianluca Marucci

Analysis of the results

As stated in the ISO 18743:2015, cited in the Regulation EU 2020/1478, laying down specific rules on official controls for *Trichinella* in meat, the results of artificial digestion methods have to be expressed only qualitatively (i.e. as positive if *Trichinella* spp. larvae are found in the sample, or negative if no larvae are present in the sample). Then the PT is considered passed if the participant correctly identified all positive and negative samples.

Laboratory code	Item type	N° of “false positive”	N° of “false negative”	Final evaluation
NRL50	100g pork	0	0	positive
NRL51	100g pork	0	0	positive
NRL52	100g pork	0	0	positive
NRL53	100g pork	0	0	positive

Summary of results:

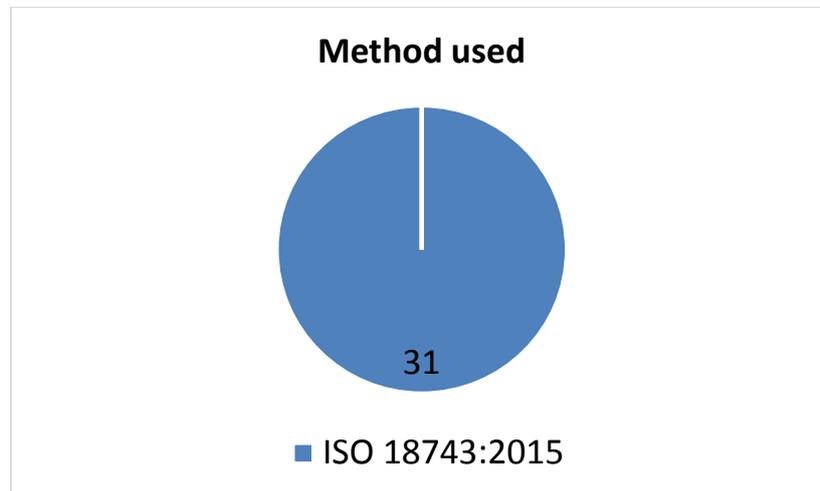

Number of participant laboratories	32
Number of participants that passed the PT	31*
Number of participants that failed the PT	0

*one participant could not complete the PT because of technical problems

All participants analyzed PT panels made of 100g pork.

All participants analysed the PT panels by applying the ISO 18743:2015 "Detection of Trichinella larvae in meat by artificial digestion method".

Comments

The laboratory NRL76 requested a new set of sample, as EQA scheme, not having been able to complete the analysis of the PT panel due to a technical problem.

Date 24/03/2022

PTP person in charge

Dr. G. Marucci

The Director

Dr. S.M. Cacciò

Notes:

1. To guarantee confidentiality, participant laboratories are identified by alphanumeric codes. PT participant identity is kept confidential and bound by professional secrecy. The PTP reserves itself the right to provide the laboratory PT result to the competent authority on request.
2. The organizer designates a qualified company for the transport and delivery of PT items.
3. Each participating laboratory receives a PT panel according to the PT scheme. Each PT item consists of minced pork or horse meat spiked or not with live *Trichinella spiralis* muscle larvae. The homogeneity of PT items is ensured by an accurate control of the number of larvae spiked into each sample (item), made by two operators using a stereo microscope. PT items are stable for 5 days from the date of preparation (corresponding to the shipping date), provided that they are maintained in suitable conditions.
4. At the beginning of each year, the organizer draws up a PT program and makes it known by publishing it on the EURLP website (for national, international, public and private laboratories) or by email (NRLs).
5. The final report issue of each PT round shows the PT program implementation.
