

ISABELLA DE ANGELIS

*Environment and Health Department
Istituto Superiore di Sanità, Roma, Italy*
isabella.deangelis@iss.it

Isabella De Angelis, graduated in Biological Sciences, is researcher at the Department of Environment and Health of Italian National Institute of Health.

Her research interests are focused on application of cell culture in toxicology with particular attention to absorption processes of chemicals and nanoparticles through the epithelial barriers. She has been involved in several National and European projects, also as PI, on *in vitro* toxicology and nanotoxicology, and on the regulatory acceptance of *in vitro* methods.

Since 2011, she is Head of Delegation at the OECD Working Party of Manufactured Nanomaterials. IDA is also member of the working group on nanomaterials of the REACH Coordinating Technical Committee of the Italian Ministry of Health and EFSA nanomaterial expert in the Competent Organisations of the Article 36 List. She carries out an intensive dissemination activity on nanosafety and application of *in vitro* methods in toxicology in several national and international conferences and courses organized by ISS, University, Local Authorities and Scientific Societies.
